Year 12 & 13
Subject Evidence Base Summaries

*A Level, Core Mathematics and Level 3
Qualifications 2021*

This booklet contains a summary of the pieces of work that have been assessed for the majority of students that will be used to form the evidence base to inform grading of A Level, Core Maths and Level 3 qualifications. Where students have missed any of the evidence pieces listed in a subject, or alternative evidence has been used, a summary indicating the individual variation within the relevant subject(s) will be provided after half term. This will also be the case for students who have made us aware of any 'mitigating circumstances', along with how marks have been adjusted, if appropriate.

Mock Examinations – December 2020

Mock examinations taken in December 2020 are included as part of the evidence base across the majority of subjects. We have records of who completed these at home and in the Examination Hall and how the evidence is potentially used will depend on the location that the assessment was taken. We would anticipate that tasks and assessments taken since Easter 2021 are more representative of students' best work, as they were undertaken later in the academic year. We did not wish to discount A Level mock examinations wholesale as they provide supportive evidence of higher grades for some students who took these assessments in the Main Hall.

UCAS 'Potential' Grades

We appreciate that for the majority of Year 13 students, their final grades will lead to a UCAS offer being 'confirmed' or 'withdrawn'. It should be noted that any grades provided at the time of application are representative of a student's *potential* in a particular subject. This should not be considered to be the same as a *predicted* grade based on a student's academic performance at the time the application is made. UCAS grades will not form part of the evidence base for any subjects.
